

JUNE 8, 2017 PUBLIC MEETING ON DISASTER PREVENTION PLANNING

Public Participation is Needed!

Pawtucket and Central Falls are developing a Multi-Jurisdictional Hazard Mitigation Plan. The plan is essential to the cities' efforts to improve emergency preparedness and identify ways to mitigate the impacts of natural hazards such as hurricanes, floods, and severe winter weather. Share your ideas for reducing risk. An overview of the entire project will be profiled at the meeting. There will be plenty of time for questions and general discussion.
